

Seminar List 2012

Chiara Lanzuolo Rome, Italy (Storazzi)	<i>"The inheritance of epigenetic signatures during DNA replication"</i>	Mon 30 January 12.00
Pura Munoz Canoves Barcelona, Spain (Minchiotti)	<i>"Inflammatory mediators in the regulation of skeletal muscle growth and repair"</i>	Mon 20 February 12.00
IGB 50TH ANNIVERSARY		Thur 1 March
Walter Gehring Basel, Switzerland	<i>"New Perspectives on the Evolution of Vision"</i>	10.00
Claudio Stern London, UK	<i>"From cells to embryo: the magic of gastrulation"</i>	11.00
Anders Bjorklund Lund, Switzerland	<i>"Use of stem cells for cell replacement in Parkinson's disease"</i>	15.00
Pierpaolo Pandolfi Boston, USA	<i>"The ceRNA hypothesis and the non-coding revolution in cancer research and therapy"</i>	16.00
Miguel Beato Barcelona, Spain (Altucci)	<i>"Progesterone signaling network to chromatin"</i>	Mon 19 March 12.00
Emmanuelle Genin Paris, France (Ciullo)	<i>"Applications of population genetics to the study of human diseases"</i>	Mon 26 March 12.00
Patrick Forterre Paris, France (Di Giulio, Defez)	<i>"New hypotheses about the origin and nature of viruses and their role in biological evolution"</i>	Mon 2 April 12.00
David Schlessinger Baltimore, USA (Valeria Ursini)	<i>"Ovarian histogenesis, sex determination, and the regulation of menopause"</i>	Wed 11 April 12.00
Marten Smidt Amsterdam (Simeone)	<i>"A Pitx3 mediated program of dopaminergic subset-specification"</i>	Mon 16 April 12.00
Massimo Hilliard Brisbane, Australia (Di Schiavi)	<i>"Axonal fusion mediates axonal regeneration in C. elegans neurons"</i>	Wed 18 April 12.00
Alain Gojon Montpellier, France (Chiurazzi)	<i>"Transceptor-mediated nitrate signaling in Arabidopsis"</i>	Mon 14 May 12.00
Istvan Ando Szeged, Hungary (Silvia Gigliotti)	<i>"The cell mediated immunity of Drosophila; hemocyte subsets, lineages and compartments"</i>	Mon 21 May 12.00
Francesco Cucca Cagliari, Italy (Ciccodicola)	<i>"Analyses of qualitative and quantitative traits in the founder Sardinian population: from genes to mechanisms"</i>	Mon 28 May 12.00

Alain Hovnanian Paris, France (Ursini)	"Netherton syndrome: skin inflammation and allergy by deregulated protease activity"	Mon 4 June 12.00
Greg Hampikian Boise, Idaho, USA (Baldini)	"The Genetics of Innocence: DNA lessons from the Amanda Knox case"	Tue 5 June 15.30
Carlo Alberto Redi Pavia, Italy (Defez)	"The unrests of biology"	Mon 11 June 12.00
Michal Schwartz Rehovot, Israel (Ursini)	"A paradigm shift in brain-immune system interaction: Circulating immune cells are key players in brain plasticity in health, disease and aging"	Mon 18 June 12.00
Carlos Ibanez Stockholm, Sweden (di Porzio)	"Signal Decoding by the p75 Neurotrophin Receptor"	Mon 10 September 12.00
Chris Tyler-Smith Cambridge, UK (Colonna)	"Studies of genetic variation in diverse human populations using large-scale genotyping and resequencing"	Mon 17 September 12.00
Daniel Peeper Amsterdam, The Netherlands (Verde)	"Unraveling cancer cell signaling networks & screening for novel therapeutic targets"	Mon 1 October 12.00
Iva Tolic-Norrelykke Dresden, Germany (La Volpe)	"Chromosome movements in meiotic prophase"	Mon 22 October 12.00
Mariano Barbacid Madrid, Spain (Verde)	"Targeting K-Ras signaling in Lung and Pancreatic Cancer"	Mon 29 October 12.00
Carmen Gianfrani Avellino, Italy (Del Pozzo)	"Intestinal immunity in celiac disease pathogenesis and strategies to recover immune tolerance to gluten"	Mon 12 November 12.00
Thomas Perlmann Stockholm, Sweden (Simeone)	"Transcription factor control of dopamine neuron development and maintenance"	Mon 19 November 12.00
Francesco Argenton Padova, Italy (La Volpe)	"Holistic signaling analysis in zebrafish"	Mon 10 December 12.00

IGB Seminar Committee

Dr. Lucia Altucci
Dr. Marina Ciullo
Dr. Adriana La Volpe
Dr. Antonio Simeone
Ms. Anna Maria Aliperti
