

Seminar List 2013

Gianvito Martino Milan, Italy (Minchiotti)	<i>"Neural stem cells: from brain homeostasis to tissue repair"</i>	Mon 21 January 12.00
Stefano Piccolo Padova, Italy (Baldini)	<i>"Tumors as developing organs: the mechanics of cancer stemness, growth factors and Hippo signaling"</i>	Mon 28 January 12.00
Stuart Ralston Edinburgh, UK (Gianfrancesco)	<i>"Pathophysiology of Paget's Disease"</i>	Mon 25 February 12.00
Alain Prochiantz Paris, France (Simeone)	<i>"Homeoprotein signaling in brain development, health and disease"</i>	Fri 1 March 12.00
Evgeni Ponimaskin Hannover, Germany (Perrone-Capano)	<i>"Role of serotonergic signalling in regulation of neuronal morphology and synaptic plasticity"</i>	Mon 18 March 12.00
Marianne Almaric Marseille, France (De Leonibus)	<i>"Optogenetic Control of Cholinergic Interneurons: Implication for Parkinson's Disease"</i>	Mon 25 March 12.00
Tommaso Pizzorusso Pisa, Italy (D'Esposito)	<i>"Role of epigenetic mechanisms in visual cortical plasticity"</i>	Mon 8 April 12.00
Bryndis Yngvadottir Cambridge, UK (Colonna)	<i>"Gorillas out of the Mist: Unravelling the Fog Surrounding another Genome"</i>	Mon 15 April 12.00
Mauro Giacca Trieste, Italy (De Falco)	<i>"Cytokines and microRNAs inducing cardiac protection and myocardial regeneration"</i>	Mon 22 April 12.00
Erik Postma Zurich, Switzerland (Colonna)	<i>"What cyclists, cemeteries and the church can tell us about the evolutionary genetics of life, love and death"</i>	Mon 29 April 12.00
Maria Passafaro Pisa, Italy (Miano)	<i>"The role of X-linked intellectual disability genes in synapse functions"</i>	Mon 13 May 12.00
Alberto Diaspro Genova, Italy (Taté)	<i>"Invisible beauty of the cell: optical nanoscopy and super resolution approaches"</i>	Mon 20 May 12.00
Roberto Mantovani Milan, Italy (Verde)	<i>"Le liaisons dangereuses" di NF-κB, un pioniere dell'epigenoma"</i>	Mon 27 May 12.00
Marie Ranson Wollongong, Australia (Stoppelli)	<i>"Molecular basis for the differential prognostic profiles of two related matrix-degrading enzyme inhibitors in cancer"</i>	Wed 29 May 12.00
Salah El Mestikawy Paris, France (Bellenchi)	<i>"The atypical vesicular glutamate transporter VGLUT3 and co-transmission"</i>	Mon 3 June 12.00

Michael Rudnicki Ottawa, Canada (Minchiotti)	"Molecular regulation of muscle stem cell function"	Tue 18 June 15.00
Dave Sulzer Columbia, USA (Bellenchi)	"The dopamine synapse in normal function and disease"	Fri 21 June 12.00
Robert Kelly Marseille, France (Baldini)	"Connecting heart and head muscle development: myogenic progenitor cells in pharyngeal mesoderm"	Mon 24 June 12.00
Peter Andreasen Aarhus, Denmark (Stoppelli)	New ways of antagonising extracellular proteolysis and cell invasion	Wed 10 July 14.00
Roberto Papa Ancona, Italy (Colonna)	Domestication and Crop Evolution	Mon 8 July
Ton Bisseling Wageningen, The Netherlands, (Chiurazzi)	"Evolution of intracellular accommodation of symbionts by host plants"	Mon 16 September 12.00
Doug Bishop Chicago, USA (Storlazzi)	"Architecture and Regulation of Meiotic Recombination Complexes"	Mon 23 September 12.00
Ryszard Kole North Carolina, USA (Lacerra)	"RNA splicing as therapeutic target. Progress in recent clinical trials"	Wed 2 October 12.00
Steve Wilson London, UK (Simeone)	Breaking symmetry in the brain: from genes to circuits and function	Mon 21 October 12.00
Lionel Navarro Paris, France (Rogato)	"Small RNA-directed control of the plant and animal innate immune responses"	Mon 28 October 15.00
Hans Schoeler Munster, Germany (Simeone)	"Induction of multi- and pluripotency"	Mon 18 November 12.00
Angela Falciatore Paris, France (Rogato)	"The molecular life of marine diatoms"	Mon 25 November 12.00
Jacopo Meldolesi Paris, France (D'Esposito)	"The exocytic processes responsible for the release of the detrimental beta amyloid protein in Alzheimer disease"	Wed 4 December 12.00

IGB Seminar Committee

Dr. Lucia Altucci
Dr. Marina Ciullo
Dr. Adriana La Volpe
Dr. Antonio Simeone
Ms. Anna Maria Aliperti
