

Seminar List 2015

Vincenzo Di Marzo Naples, Italy (Simeone)	"The endocannabinoid system: from pleiotropic system of pro-homeostatic lipid mediators setting the stage for new genetically modified mice, to target for the development of drugs for rare genetic disorders"	Mon 12 January 12.00
Claire Francastel Paris, France (Matarazzo)	"DNA methylation pathways: what can we learn from the ICF syndrome"	Mon 2 February 12.00
Chris Ponting Oxford, UK (Cimmino)	"lncRNAs: Major Players or Minor Roles in Fundamental Cell Biology?"	Mon 9 February 12.00
Fulvio Esposito Camerino, Italy (Autiero/Simeone)	"European Research(ers) Area: what next?"	Tue 17 February 12.00
Claire Chazaud Clermont, France (Fico)	"Cell lineage specification in the mouse blastocyst"	Mon 16 March 12.00
Kari Alitalo Helsinki, Finland (G.P Committee)	GRAZIELLA PERSICO LECTURE "Targeting endothelial growth factor pathways in cancer and cardiovascular disease"	Mon 23 March
Toomas Kivisild Cambridge, UK (Colonna)	"Regional patterns of human genetic diversity outside Africa inferred from the analysis of more than 400 high coverage genomes"	Mon 30 March 15.00 Aula II piano
Ennio De Gregorio Siena, Italy (Prisco)	"Breakthrough Technologies for Human Vaccines"	Mon 27 April 12.00
Wolfgang Wurst Munich, Germany (Simeone)	"Genetic tools deciphering molecular mechanism underlying Parkinson Disease"	Mon 4 May 12.00
Alfonsa Martelli Padova, Italy (Simeone)	"Il bando Smart & Start: case history di interesse per la ricerca scientifica"	Thur 21 May 11.00
Robert Blelloch San Francisco, CA, USA (Minchiotti)	"How to avoid commitment –epigenetic maintenance of pluripotency"	Mon 25 May 12.00
Mathieu Bertrand Ghent, Belgium (Ursini)	"New twist in TNF signaling: NF- κ B-independent roles of IKKa/b in regulating RIPK1-dependent death"	Mon 8 June 12.00
Erwin Wagner Spain (Verde)	"AP-1(Fos/Jun) at the intersection between Inflammation, Metabolism and Cancer"	Mon 15 June 12.00
Nicolai Sidenius Milan, Italy (Stoppelli)	"A novel function of the plasminogen activation in the regulation of mechanotransduction and desmoplasia"	Mon 6 July 12.00
Dario Greco Helsinki, Finland (Costa)	"Introduction to Systems Nanotoxicology"	Wed 9 September 12.00

Bruno Giros Canada (De Leonibus)	"Deciphering the role of noradrenergic signaling using conditional deletion of the Vesicular Monoamine Transporter type-2"	Mon 14 September 12.00
Claudio Stern London, UK (Antonio Simeone)	"Two for the price of one: twinning – the ultimate regeneration"	Fri 25 September 11.00
Oscar Marin London, UK (Simeone)	"Molecular regulation of cortical interneuron diversity and plasticity"	Mon 12 October 12.00
Anne Ridley London, UK (Alfano)	"Rho GTPase signalling in cell adhesion and migration"	Mon 26 October 12.00
Michael Green Boston, USA (D'Esposito)	Genetic and Pharmacological Reactivation of the Mammalian Inactive X Chromosome: Implications for Treatment of Rett Syndrome	Mon 2 November 12.00
Alessandra Pierani Paris, France (Simeone)	"Long-range patterning via moving organizers and evolution of the neocortex"	Mon 9 November 12.00
Barbara Bardoni Valbonne, France (Miano)	"Fragile X syndrome: molecular and cellular bases of a synaptopathy"	Mon 23 November 12.00
Geert Carmeliet Leuven, Belgium (Gianfrancesco)	"Hypoxia and the skeleton: role in bone development and fracture repair"	Mon 30 November 12.00
Stefan Knapp Oxford, UK (Della Ragione)	"Selective targeting of epigenetic reader domains"	Mon 14 December 12.00

IGB Seminar Committee

Dr. Marina Ciullo
Dr. Gabriella Minchiotti
Prof. Antonio Simeone
Ms. Anna Maria Aliperti
